AIR MATTRESSES

Alternating Pressure Mattress & Pump
Stage 1 & 2 Pressure Care, With Cover & Flaps

Alternating Pressure Mattress
Stage 1 & 2 Pressure Care, 1 in 3 Cycle

A/B/C Cycle Mode (1-in-3)

More Comfortable

QDC-501B **A** Alternating Pressure Mattress is made up by 18 pcs of 11cm / 4.5" cells. The Alternating System includes A/B/C 3 groups of cells design (6 cells per group). During alternating, there always have 2 groups of cells keep inflating, it means that it will have 12 cells can share and support the patient's weight. Compared with the A/B 2 groups alternating model **B** (just have 9 cells keep inflating at the same time), the share weight of the A/B/C Cycle Mode alternating mattress will be more average. The patient can feel more comfortable and have better sleeping quality.

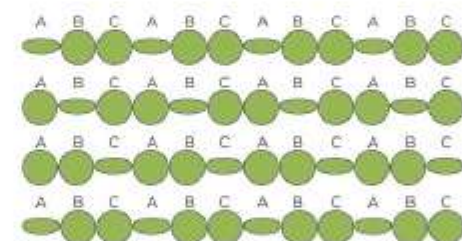

A (1-in-3 Alternating Mode)

$18 \times \frac{2}{3} = 12$ cells (Quantity of the Supporting Cells)

$\frac{80}{12} = 6.7\text{kg}$ /cell (Support Weight by Each Cell)

A/B/C 3 Groups Alternating Cycle Mode (1-in-3)

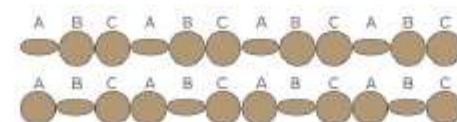

B (1-in-2 Alternating Mode)

$18 \times \frac{1}{2} = 9$ cells (Quantity of the Supporting Cells)

$\frac{80}{9} = 8.9\text{kg}$ /cell (Support Weight by Each Cell)

A/B 2 Groups Alternating Cycle Mode (1-in-2)
